HazWasteOnline™

The Waste Classification Tool
Professional & Packages Edition

⚠ **Hazardous Waste**
Classified as 17 02 04 *
in the European Waste Catalogue 2002

✓ **Non-Hazardous Waste**
Classified as 17 01 07
in the European Waste Catalogue 2002

❊ **Potentially Hazardous Waste**
Classified as 17 03 02 or 17 03 01 *
in the European Waste Catalogue 2002

HP 10: Toxic for reproduction "waste which has adverse effects on sexual function and fertility in adult males and females, as well as developmental toxicity in the offspring"

Hazard Statements hit:

Repr. 1A; H360Df "May damage the unborn child. Suspected of damaging fertility."

Because of determinand:

lead compounds (with the exception of those listed separately in this Annex): (Note 1 conc.: 1.62%)
HP 14: Ecotoxic "waste which presents or may present immediate or delayed risks for one or more sectors of the environment"

Risk phrases hit:

R50/53 "Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment"

Because of determinands:

zinc oxide: (compound conc.: 0.18%)
nickel sulfate: (compound conc.: 0.139%)
copper (I) oxide: (compound conc.: 0.113%)

The richness of the functionality delivered by HazWasteOnline™ is unavailable from anywhere else and is the reason why this cloud based software is the standard waste classification software in the industry. **HazWasteOnline™** allows the user to rapidly classify their waste as either hazardous or non-hazardous based on the latest UK / EU technical guidance, legislation and data.

No more internal spreadsheets to maintain. Always current, transparent and auditable.

Simply import your laboratory analysis data using the .hwol file format and then classify the data with a single click. The result is a report that details each sample's classification and explains why; presenting the hazard properties and hazard statement codes, together with additional commentary where necessary including the legislation in force at the time of the classification. Perfect for reporting and auditing.

The tool can be used iteratively, allowing the user to refine their classification(s) based on knowledge of the materials and processes that created the waste.

HazWasteOnline™ saves significant time, better manages risk, provides transparency and auditability and pays for itself no matter what the usage frequency. It lets the user focus on what is in the data rather than the mathematics of the classification.

Professional & Packages Edition has all the features of the Professional Edition plus:

▸ Both the absolutue hazardous and non-hazardous entries from the List of Waste;
▸ The ability to import, reprocess and archive the data contained in any third party **HazWasteOnline™** classification report - simply using your smart phone;
▸ WAC – the user can also import and the process WAC data to determine whether their waste can be accepted at the various classes of landfill,.
▸ Graphical tool to help identfy the source of the hydrocarbons in a waste using PAH double ratio plots such as clinker in soil:

▸ Copy existing substances to more rapidly create user defined substances.
